

PNEUMATIC SOLENOID VALVES

SV001

SV002

SV010

- New flying lead solenoid coil - Eliminates water ingress at solenoid.
- New nickle plated brass valve stem - Decreases risk of corrosion between stem and solenoid coil.
- Normally closed 1/8G Valve.
- Bankable configuraton
- Supplied as single or 10 bank.

Part Numbers

SV001	-	24VDC Single Valve
SV002	-	12VDC Single Valve
SV010/A	-	24VDC 10 Bank Valve assembly
SV010/B	-	12VDC 10 Bank Valve Assembly

Notes

1. Flying lead solenoid coils are interchangeable with current hirschman plug style solenoid coils on Mega Pacific Valves with 9mm diameter stems.
2. Hirschman style valves & solenoids will be progressively replaced by flying lead style.
3. Early model Pneumax Valves with 10mm valve stems require solenoid MB4 (12V) or MB5 (24V). Only available while stocks last.
