

AXIAL PISTON PUMP PAI

A fixed displacement Axial Piston Pump designed to offer a robust solution with long service life for high pressure requirements in Transport Hydraulics.

Features:

- Dual Rotation.
- Captive Pistons.
- Dual Shaft Seals.
- Relatively insensitive to contamination.
- 500bar instantaneous peak pressure capability.
- 97% efficient at 350bar at 1000rpm.
- PZB 3 Bolt mount. Female splined shaft.

Pump Specification

CODE	DISPLACEMENT CM ³ / REV	PRESSURE BAR (CONT)	RPM MAX CONT	PRESSURE PORT	INLET PORT	WEIGHT KG
PAI50-0512790	50cc	350	1750	G3/4"	G1 1/2"	15

*** NOTE: ONLY TO BE USED WITH 6 BOLT MALE SHAFT PTO's/ADAPTORS**
